

TECHNICAL SPECIFICATIONS

Engine: Twin cylinder - 4 strokes - alloy engine with parallel cylinders and 180 degree cranks - bore 78MM - stroke 52MM, total displacement of 496 cc. Compression ratio, 10-1 - Desmo distribution S.O.H.C., - carburation by two Dell'Orto PHF 30 carbs - solid crankshaft on plain bearings - high pressure lubrication with gearpump and net and cartridge filters - oil warning light to detect low oil pressure. Primary by gears - oil bath multi disc clutch - five speed gearbox - final drive by chain. Battery and coils ignition - 12V - 18 ah battery - 150W alternator - Standard electric starter. Transmission: Tubular double open cradle - front double action telescopic fork suspension - rear swing-arm suspension with double action hydraulic Electrical Equipment: Shock absorbers and adjustable concentric springs. Wheels, Brakes, Tires: Dimensions and weight: Length 205cm - width 67cm, - wheelbase 140 cm, - weight 170 Kgs dry. Performances: Mas speed 185 km/h - fuel consumption 23 Km/l.
