ADAMO WINS LIGHTWEIGHT VINTAGE GP RACE

This years Daytona seemed to have a little of everything in the racing scene. A lot of old timers and new timers brought out their antiques and put them on the race track for a showing of what racing was like a few decades ago. This was the first time that Vintage racing has taken place in the Daytona infield.

Jim Adamo aboard a 350 Ducati. The little 350 was right in there in second place against the 500cc G50 Matchless of Dave Roper. Adamo was overtaken by another G50 Matchless driven by Clive Watts, and the Little D finished third overall against BSA Gold Stars and Velocettes. Most of the other rider that made up the rest of the pack were only out there for a fun race. You can't blame them for trying to preserve all that fine machinery.
