## DUCATI FLATTRACKERS

Sure-Fire Distributing of Asheville North Carolina, and Reno Leoni, the ace tuner behind Jimmy Adamo's many Battle of the Twins road race victories, have joined forces to produce race-ready Ducati powered dirt track bikes. Using the Ducati 600 V-twin as a base, the 750cc dirt trackers are expected to be available shortly.

In the past few years two 750 SS powered flattrackers have been campaigned on flat track circuits but they have had many problems and have not been competitive. We have photos of these 750SS trackers, but we lack much info. We'd like to do an article on this bike, if you can help, let us know.

Bill Burbank of Sure-Fire is sending us more details on the Pantah trackers so we hope to pass along this info in our next issue. For more details call Bill at 704-255-8096.
